## SUGGESTED ANSWERS/HINTS

1. (i) False: Net income is determined by preparing income and expenditure in case of persons practicing vacation.
(ii) True: No interest is allowed when the due date of a bill falls after the date of closing the account. However, interest from the date of closing to such due date is written in 'Red Ink' in the appropriate side of account current.
(iii) False: Consignment account is a nominal-cum-personal account.
(iv) True: The balance represents the cash physically in existence and is therefore an asset.
(v) True: Because it depicts that one aspect of the double entry has been completed.
(vi) True: Institutions sometimes keep special funds for some special purposes. In such a case the income related to such funds should be added to these funds and expenses should be deducted from such funds.
(vii) True: Salary paid in advance relates to the coming accounting period. It has nothing to do with the current period. Hence it is not taken in the Profit and Loss Account as an expense. It is shown as a Current Asset in the Balance Sheet.
(viii) True: Because the laboratory and library deposits are of the nature of security deposits to be refunded to the students on their leaving the College or University.
2. (a) The main advantage of setting accounting standards is that the adoption and application of accounting standards ensure uniformity, comparability and qualitative improvement in the preparation and presentation of financial statements. The other advantages are: Reduction in variations; Disclosures beyond that required by law and Facilitates comparison.
(b) Cash and mercantile system: Cash system of accounting is a system by which a transaction is recognized only if cash is received or paid. In cash system of accounting, entries are made only when cash is received or paid, no entry being made when a payment or receipt is merely due. Cash system is normally followed by professionals, educational institutions or non-profit making organizations.
On the other hand, mercantile system of accounting is a system of classifying and summarizing trandsactions into assets, liabilities, equity (owner's fund), costs, revenues and recording thereof. A transaction is recognized when either a liability is created/ impaired and an asset is created /impaired. A record is made on the basis of amounts having become due for payment or receipt irrespective of the fact whether payment is made or received actually.
Mercantile system of accounting is generally accepted accounting system by business entities

Note: In the above solution, transfer of ownership is assumed to take place at the time of delivery of goods. If it is assumed that transfer of ownership takes place on the date of invoice, then ₹ 4,000 goods delivered in March 2018 for which invoice was received in April, 2018, would be treated as purchases of the accounting year 2017-2018 and thus excluded. Similarly, goods dispatched in March, 2018 but invoiced in April, 2018 would be excluded and treated as sale of the year 2017-2018.

$$

Mehnaaz wants to save interest of ₹ 157 . The yearly interest is ₹ $20,000 \times 18 \%$

$$
=₹ 3,600 \text {. }
$$

Assume that days corresponding to interest of $₹ 157$ are Y .
Then, $3,600 \times \mathrm{Y} / 365=₹ 157$
or $Y=157 \times 365 / 3,600=15.9$ days or 16 days (Approx.)
Hence, if Mehnaaz wants to save ₹ 157 by way of interest, she should prepone the payment of amount involved by 16 days from the Average Due Date. Hence, she should make the payment on 18.7.2018 (3.8.2018-16 days).

Calculation of amount to be transferred to Capital Reserve
Forfeited amount per share $=₹ 75,000 / 2500=₹ 30$
Loss on re-issue =₹ $70-₹ 60=$ ₹ 10
Surplus per share re-issued ₹ 20
Transferred to capital Reserve ₹ $20 \times 2000=₹ 40,000$.

19. Current Ratio $=2.5: 1$ (Given)

Let Current Liabilities $=\mathrm{x}$
Then, Current Assets $=2.5 \mathrm{x}$
Working Capital $=$ Current Assets - Current Liabilities
₹ $6,00,000=2.5 x=x$
₹ $6,00,000=1.5 x$
Therefore,
(i) Current Liabilities ( x ) $=\frac{R s \cdot 6,00,000}{1.5}=₹ 4,00,000$
(ii) Current Assets $=₹ 4,00,000 \times 2.5=₹ 10,00,000$
(iii) Liquid Ratio/Acid Test Ratio $=\frac{\text { Quick Assets }}{\text { Current Liabilities }}=\frac{₹ 6,00,000}{4,00,000}=1.5: 1$

Quick Assets = Current Assets - Inventories = ₹ $10,00,000-₹ 4,00,000=₹ 6,00,000$
20. (i) Double entry system may be defined as that system which recognizes and records both the aspects of a transaction.
Every transaction has two aspects and according to this system, both the aspects are recorded. This system was developed in the $15^{\text {th }}$ century in Italy by Luca Pacioli. It has proved to be systematic and has been found of great use for recording the financial affairs for all institutions requiring use of money.

This system offers the under mentioned advantages:
(a) By the use of this system, the accuracy of the accounting work can be established through the device of trial balance.
(b) The profit earned or loss suffered during a period can be ascertained together with details.
(c) The financial position of the firm or the institution concerned, can be ascertained at the end of each period, through preparation of the balance sheet.
(d) The system permits accounts to be kept in as much detail as necessary and therefore, affords significant information for the purpose of control etc.
(e) Result of one year may be compared with those of previous years and reasons for the change may be ascertained. It is because of these advantages that the double entry system has been used extensively in all countries.
(ii) Banks are essential to modern society, but for an industrial unit, it serves as a necessary instrument in the commercial world. Most of the transactions of the business are done through bank whether it is a receipt or payment. Rather, it is legally necessary to operate the transactions through bank after a certain limit. All the transactions, which have been operated through bank, if not verified properly, the industrial unit may not be sure about its liquidity position in the bank on a particular date. There may be some cheques which have been issued, but not presented for payment, as well as there may be some deposits which has been deposited in the bank, but not collected or credited so far. Some expenses might have been debited or bills might have been dishonoured. It is not known to the industrial unit in time, it may lead to wrong conclusions. The errors committed by bank may not be known without preparing bank reconciliation statement. Preparation of bank reconciliation statement prevents the chances of embezzlement. Hence, bank reconciliation statement is very important and is a necessity of an industrial unit as it plays a key role in the liquidity control of the industry.
(iii) A bill of exchange is an instrument in writing containing an unconditional order, signed by the maker, directing a certain person to pay a certain sum of money to or to the order of certain person or to the bearer of the instrument. When such an order is accepted by the drawee on the face of the order itself, it becomes a valid bill of exchange.
There are three parties to a bill of exchange:
(i) The drawer, who draws the bill, that is, the creditor to whom the money is owing;
(ii) The drawee, the person to whom the bill is addressed or on whom it is drawn
and who accepts the bill that is, the debtor; and
(iii) The payee, the person who is to receive the payment. The drawer in many cases is also the payee.
(iv) A joint venture account is a nominal account prepared by the co-venturers involved in the joint ventures. The objective of preparing a joint venture account is to ascertain the profit or loss arising out of the joint venture business. The joint venture account is debited with the value of goods or stores bought or used on account of joint venture. It is also debited with expenses incurred. The credit will be to the trading account or cash account or to the party which has supplied the goods or incurred the expenses. When the sale proceeds are received, the party receiving it will debit bank account (or sundry debtors) and credit the joint venture account. The other party will debit the party which has received the sale proceeds and credit the joint venture account.

Thus, joint venture account will reflect profit or loss, which must be transferred to the profit and loss account and the other party's account in agreed proportions.
(v) Transactions are first entered in a book called 'Journal' to show which account should be debited and which should be credited. Journal creates preliminary records and, is also called subsidiary book. All transactions are first recorded in the journal as and when they occur, the record is chronological, otherwise it would be difficult to maintain the records in an ordinary manner. Journal gives details regarding any transaction. Thus journal tells the amounts to be debited and credited and also the accounts involved.
