## PAPER : PRINCIPLES \& PRACTICE OF ACCOUNTING <br> Question no. 1 is compulsory. <br> Candidates are required to answer any four questions from the remaining five questions.

## Answer 1:

(a) (i) Under FIFO method of inventory valuation, inventories purchased first are issued first. The closing inventories are valued at latest purchase prices and inventory issues are valued at corresponding old purchase prices. In other words, under FIFO method, costs are assigned to the units issued in the same order as the costs entered in the inventory. During periods of rising prices, cost of goods sold are valued at older and lower prices if FIFO is followed and consequently reported profits rise due to lower cost of goods sold.
On the other hand, under LIFO method of inventory valuation, units of inventories issued should be valued at the prices paid for the latest purchases and closing inventories should be valued at the prices paid for earlier purchases. In other words, closing inventories are valued at old purchase prices and issues are valued at corresponding latest purchase prices.

## Answer 1:

(a) (ii) Receipt and Payment Account is an elementary form of account consisting of a classified summary of cash receipts and payments over a certain period together with cash balances at the beginning and close of the period. The receipts are entered on the left hand side and payments on the right hand side i.e. same sides as those on which they appear in cash book. All the receipts and payments whether of revenue or capital nature are included in this account. The balance of the account at the end of a period represents the difference between the amount of cash received and paid up. It is always in debit since it is made up of cash in hand and at bank.
Income and Expenditure Account resembles a Profit and Loss Account and serves the same function in respect of a non-profit making concern as the last mentioned account does for a firm, carrying on business or trade. Income and Expenditure Account is drawn up in the same form as the Profit and Loss Account. Expenditure of revenue nature is shown on the debit side, income and gains of revenue nature are shown on the credit side. Income and Expenditure Account contains all the items of income and expenditure relevant to the period of account, whether received or paid out as well as that which have fallen due for recovery or payment. Capital Receipts, prepayments of income and capital expenditures, prepaid expenses are excluded. It does not start with any opening balance. The closing balance represents the amount by which the income exceeds the expenditure only or vice versa.

## Answer:

(b) (i) In business enterprises, many receipts and payments by and from a single party may occur at different points of time. To simplify the calculation of interest involved for such transactions, the idea of average due date has been developed. Average Due Date is a break-even date on which the net amount payable can be settled without causing loss of interest either to the borrower or the lender.

## Answer:

(b) (ii) Debenture is one of the most commonly used debt instrument issued by the company to raise funds for the business. The most common method of supplementing the capital available to a company is to issue debentures which may either be simple or naked carrying no charge on assets, or mortgage debentures carrying either a fixed or a floating charge on some or all of the assets of the company.

(2) (A) Excess amount received from R on application :

R has been allotted 400 shares. He must have applied for more shares.
If shares allotted were 2,00,000, shares applied for were $=3,00,000$
$\therefore$ If shares allotted were $2,00,000$, shares applied for were $=\frac{3,00,000}{2,00,000} \times 400$
$=600$ shares. $\{1 / 2 \mathrm{M}\}$

$=3,00,000$
$=5,00,000$
$=1,000\} 1 / 2 \mathrm{M}\}$
$=4,99,000\} 1 / 2 \mathrm{M}\}$
(3) Premium is due with allotment. $R$ has not paid the amount of allotment. Premium is due with allotment. $R$ has not paid the amount of allotment.
Therefore, Securities Premium $A / c$ Will be debited by 400 shares $\times$ Rs. $2=R s.]^{\{1 / 2 ~ M\}}$
800 .
(4) $M$ has paid the amount of allotment. Therefore, he has paid premium also. Premium Reserve A/c' will not be once collected cannot be cancelled. As such 'Security Premium Reserve $A / c^{\prime}$ will not be debited when his shares are forfeited.
(5) Only 800 shares are re-issued. Therefore, the profit on 800 shares will only be transferred to Capital Reserve :
Profit on 400 shares of $R=\quad=\quad$ Rs. 1,800$\}\{1 / 2 \mathrm{M}\}$
Profit on 400 shares of $M=\frac{R s .3,000}{6400 \text { shares }=} \quad=\quad$ Rs. $2,000\{1 / 2 \mathrm{M}\}$ Profit on 400 shares of $M=\frac{\text { 600shares }}{6040 \text { shares }}$

Rs. 3,800
Less : Loss on re-issued of 800 shares @ Rs. 1 each
Rs. 800
Rs. 3,000$\} \mathbf{1 / 2} \mathbf{~ M}\}$
(6) Profit on 600 shares of M was Rs. 3,000, out of which 400 shares have beenreissued. Therefore, the balance of profit remaining in Share Forfeiture A/c for 200 shares $=\frac{3,000}{600} \times 200=$ Rs. 1,000 . This balance of Rs. 1,000 will be shown on the liabilities side of the Balance Sheet under the head 'Share Capital'.
