## PAPER : PRINCIPLES \& PRACTICE OF ACCOUNTING

## Question no. 1 is compulsory.

Candidates are required to answer any four questions from the remaining five questions.

Answer 1:
(a) (i) DISTINCTION BETWEEN MONEY MEASUREMENT CONCEPT AND MATCHING CONCEPT
As per Money Measurement concept, only those transactions, which can be measured in terms of money are recorded. Since money is the medium of exchange and the standard of economic value, this concept requires that those transactions alone that are capable of being measured in terms of money be only to be recorded in the books of accounts. Transactions and events that cannot be expressed in terms of money are not recorded in the business books.
In Matching concept, all expenses matched with the revenue of that period should only be taken into consideration. In the financial statements of the organization if any revenue is recognized then expenses related to earn that revenue should also be recognized.

## Answer:

## (a) (ii) DISTINCTION BETWEEN PERIODIC INVENTORY SYSTEM AND

 PERPETUAL INVENTORY SYSTEMBoth the systems - Periodic Inventory System and Perpetual Inventory System are not mutually exclusive and complementary in nature. Distinction between both the systems can be explained as follows:

| S. <br> No. | Periodic Inventory System | Perpetual Inventory System |
| :---: | :--- | :--- |
| 1. | This system is based on physical <br> verification. | It is based on book records. |
| 2. | This system provides information <br> about inventory and cost of goods <br> sold at a particular date. | It provides continuous information <br> about inventory and cost of <br> sales. |
| 3. | This system determines inventory <br> and takes cost of goods sold as <br> residual figure. | It directly determines cost of <br> goods sold and computes <br> inventory as balancing figure. |
| 4.Cost of goods sold includes loss of <br> goods as goods not in inventory are <br> assumed to be sold. | Closing inventory includes loss of <br> goods as all unsold goods are <br> assumed to be in Inventory. |  |
| 5. | Under this method, inventory <br> control is not possible. | Inventory control can be exercised <br> under this system. |
| 6.This system is simple and less <br> expensive. | It is costlier method. <br> 7.Periodic system requires closure of <br> business for counting of inventory. | Inventory can be determined <br> without affecting the operations of <br> the business. |

## Answer:

(b) (i) Accounting Policies refer to specific accounting principles and methods of applying these principles adopted by the enterprise in the preparation and
presentation of financial statements. Policies are based on various accounting concepts, principles and conventions. There is no single list of accounting policies, which are applicable to all enterprises in all circumstances. Enterprises operate in diverse and complex environmental situations and so they have to adopt various policies.
The areas wherein different accounting policies are frequently encountered can be given as follows:
(1) Valuation of inventories;
(2) Valuation of investments.

Answer:
(b) (ii) Inventory can be defined as assets held

- for sale in the ordinary course of business, or
- in the process of production for such sale, or
- for consumption in the production of goods or services for sale, including maintenance supplies and consumables other than machinery spares.
The significance of inventory valuation arises due to the following reasons:
(i) Determination of Income
(ii) Ascertainment of Financial Position
(iii) Liquidity Analysis
(iv) Statutory Compliance

Working Notes: (1) Calculation of Goodwill and its adjustment

| Aggregate profits of the 5 years (as given) | Rs. |
| :--- | ---: |
| Add: Adjustment in the Profit \& Loss Adjustment A/c | 6,300 |

$\left.\left.\begin{array}{|l|r|}\hline \text { Adjusted profit for } 5 \text { years } & 83,000 \\ \hline \text { Average profit } & 16,600 \\ \hline \text { Goodwill is } 3 \text { years' purchase of the average profit (Rs. } 16,600 \times 3 \text { ) } & 49,800\end{array}\right\} \mathbf{1 ~ M}\right\}$

C's share of goodwill is $4 / 10$ of Rs. 49,800 = Rs. 19,920; C's share of goodwill purchased by A and B in the ratio 3 : 2. Therefore, A's share-3/5 of Rs. 19,920 = Rs. 11,952; B's share $2 / 5$ of Rs. $19,920=$ Rs. 7,968.

## Calculation of New Profit Sharing Ratio between A and B:

C's share of $4 / 10$ is purchased by $A$ and $B$ in the ratio $3 / 5$ and $2 / 5$. Therefore, $A$ will get from $\mathrm{C}-4 / 10 \times 3 / 5=12 / 50$. B will get from $\mathrm{C}-4 / 10 \times 2 / 5=8 / 50$. Total share of $A$, therefore $-3 / 10+12 / 50=27 / 50$. Total share of $B$, therefore $-3 / 10+8 / 50=23 / 50$. Therefore, thre ratio between $A$ and $B$ is $27: 23$.

Adjustment in Regard to capital of $A$ and $B$
Rs.

| Adjusted Capital of A (Rs. $50,000+3,000+2,010+4,200+27,000-11,952)$ | 74,258 |

| Total adjusted capitals of A and B | $1,45,000$ |

The total capital of $A$ and $B$ will be shared in the ratio $27: 23$. Therefore closing capital balance will be :

A $-27 / 50 \times$ Rs. $1,45,000=$ Rs. 78,$300 ; B-23 / 50 \times$ Rs. $1,45,000=$ Rs. 66,700 . $\left.\}_{\{1 / 2} \mathrm{M}\right\}$

(Depreciation Rs. 500$)=$ Rs. $49,500.15 \%$ Depreciation $=$ Rs. $7,425$.
