## **PRINCIPLES AND PRACTICE OF ACCOUNTING**

### **(DECEMBER 2020)**

---

**Answer 1:**

- (a) (i) **False :**  
**Reason :** Profit or Loss due to revaluation of Assets & Liabilities belongs to old partners and hence it is transferred to old partners capital account in there old profit sharing ratio.
- (ii) **True :**  
**Reason :** According to the provision of Section 52 of Companies Act 2013 the amount of securities premium can be utilise in writting off preliminary expenses. In the given situation company has sufficient fund in securities premium account to write off preliminary expenses.
- (iii) **True :**  
**Reason :** Insurance claim received from Insurance Company on account of plant and machinery damaged by fire is a capital receipt. It is not a normal business activity, it is a reliasation of asset. Hence it is treated a capital receipt.
- (iv) **False :**  
**Reason :** Office furniture & fixture purchased are capital expenditure which had been treated a revenue expenditure. It is error of a principal not a error of omission.
- (v) **False :**  
**Reason :** Goods sent by consiner to consinee doesn't mean transferring of ownership. It is just a transfer of physical possession of goods. So a performa invoice is sent by the consiner to consinee. So the opinion of accountant of A Limited sending a sale invoice is wrong.
- (vi) **False :**  
**Reason :** In this situation business is no more a going concern. So at the time of preparation of balance sheet assets should be disclosed at their net realisable value in balance sheet instead off historical cost.
- (b) A chartered accountant with his education, training, analytical mind and experience is best qualified to provide multiple need-based services to the ever growing society. The practice of accoutancy has crossed its usual domain of preparation of financial statements, interpretation of such statements and audit thereof. Accountants are presently taking active role in company laws and other corporate legislation matters, in taxation laws matters (both direct and indirect) and in general management problems. Following are area of services :
1. Maintenance of Books of Accounts.
  2. Statutory Audit.
  3. Internal Audit.
  4. Taxation.
  5. Management Accounting and Consultancy Services.
  6. Financial Advice.

**W.No. 1 :**

**Calculate Correct Amount of Depreciation**

Since Purchases of machinery worth Rs. 12,00,000 has been omitted.

So depreciation omitted from being charged =  $12,00,000 \times 15\% = 1,80,000$

Correct total Depreciation expense =  $2,15,000 + 1,80,000 = 3,95,000$  Rs.

**W.No. 2 :**

**Calculate Correct Wages**

Wages worth Rs. 50,000 will be excluded from manufacturing account as they pertain to office and hence will be charged to P&L a/c.

**W.No. 3 :**

**Calculate Correct Direct Expenses**

**Expenses to be Excluded from Direct Expenses.**

|   |   |               |
|---|---|---------------|
| Office electricity charges (80,000 x 25%) | = | 20,000        |
| Delivery charges to customer's            | = | <u>22,000</u> |
|   |   | <u>42,000</u> |

Revised Direct Expenses =  $2,49,000 - 42,000 = 2,07,000$  Rs.

**W.No. 4 :**

**Revised Balance to be transferred to Trading A/c**

**Cost of Asset :**

Cost of a depreciable asset represents its money outlay or its equivalent in connection with its acquisition, installation and commissioning as well as for additions to or improvement thereof for the purpose of increase in efficiency. We have discussed this in more detail in coming paragraphs.

**Useful life of the asset :**

'Useful Life' is either (i) the period over which a depreciable asset is expected to be used by the enterprise or (ii) the number of production or similar units expected to be obtained from the use of the asset by the enterprise. Determination of the useful life is a matter of estimation and is normally based on various factors including experience with similar type of assets. Several other factors like estimated working hours, production capacity, repairs and renewals, etc. are also taken into consideration on demanding situation.

**Scrap (residual value) :**

Determination of the residual value is normally a difficult matter. If such value is considered as insignificant, it is normally regarded as nil. On the other hand, if the residual value is likely to be significant, it is estimated at the time of acquisition / installation, or at the time of subsequent revaluation of asset.
