## ACCOUNTS

Q. No. 1 is compulsory.

Candidates are required to answer any four questions from the remaining five questions. Wherever necessary suitable assumptions should be made by the candidates. Working notes should form part of the answer.

## Answer 1:

(a) The decision of making provision for non-moving inventories on the basis of technical evaluation does not amount to change in accounting policy. Accounting policy of a company may require that provision for non-moving inventories should be made. The method of estimating the amount of provision may be changed in case a more prudent estimate can be made.
In the given case, considering the total value of inventory, the change in the amount of required provision of non-moving inventory from Rs. 3.5 lakhs to Rs. 2.5 lakhs is also not material. The disclosure can be made for such change in the following lines by way of notes to the accounts in the annual accounts of ABC Ltd. for the year 2016-17:
"The company has provided for non-moving inventories on the basis of technical evaluation unlike preceding years. Had the same method been followed as in the previous year, the profit for the year and the corresponding effect on the year end net assets would have been lower by Rs. 1 lakh."

(d) Entity A's management can apply the revaluation model only to the office buildings.) The office buildings can be clearly distinguished from the industrial buildings in terms of their function, their nature and their general location.AS 10 (Revised) permits assets to be revalued on a class by class basis.
The different characteristics of the buildings enable them to be classified as different PPE classes. The different measurement models can, therefore, be applied to these classes for subsequent measurement.

## Working Notes:

1. Time Ratio

Time ratio is $1: 2$.
2. Sales ratio

Let the monthly sales for first 6 months (i.e. from 1.4.20X1 to 30.09.20X1) be $x$ Then, sales for 6 months $=6 x$
Monthly sales for next 6 months (i.e. from 1.10.X1 to 31.3.20X2) $x+\frac{2}{3} x=\frac{5}{3} x$
Then, sales for next 6 months $=\frac{5}{3} x \times 6=10 \times$
Total sales for the year $=6 x+10 x=16 x$
Monthly sales in the pre incorporation period = Rs. 19,20,000/16 = Rs. 1,20,000
Total sales for pre-incorporation period = Rs. 1,20,000 x $4=$ Rs. 4,80,000
Total sales for post incorporation period = Rs. 19,20,000 - Rs. 4,80,000 = Rs. 14,40,000
Sales Ratio $=4,80,000: 14,40,000=1: 3$
