## Answer 1:

(a) As per AS 19 'leases', a lease will be classified as finance lease if at the inception of the lease, the present value of minimum lease payment amounts to at least substantially all of the fair value of leased asset. In the given case, the implicit rate of interest is given at $15 \%$. The present value of minimum lease payments at 15\% using PV- Annuity Factor can be computed as:

| Annuity Factor (Year 1 to Year 5) | 3.36 (approx.) |
| :--- | :--- |
| Present Value of minimum lease payments <br> (Rs. 3 lakhs each year) | Rs. 10.08 lakhs (approx.) |

Thus present value of minimum lease payments is Rs. 10.08 lakhs and the fair value of the machine is Rs. 30 lakhs. In a finance lease, lease term should be for the major part of the economic life of the asset even if title is not transferred. However, in the given case, the effective useful life of the machine is 14 years while the lease is only for five years. Therefore, lease agreement is an operating lease. Lease payments under an operating lease should be recognized as an expense in the statement of profit and loss on a straight line basis over the lease term unless another systematic basis is more representative of the time pattern of the user's benefit.

## Working Notes:

1. Computation of theoretical ex-rights fair value per share $=$

Fair value of all outstanding shares immediately prior to exercise of rights + total amount received from exercise Number of shares outstanding prior to exercise + number of shares issued in the exercise
$[($ Rs. $35 \times 15,00,000)+($ Rs. $25 \times 5,00,000)] /(15,00,000+5,00,000)=$ Rs. 32.5$\}\{\mathbf{1 / 2} \mathbf{~ M \}}$
2. Computation of adjustment factor

## Answer:

(c) According to AS 18 on 'Related Party Disclosures', parties are considered to be related if at any time during the reporting period one party has the ability to control the other party or exercise significant influence over the other party in making financial and/or operating decisions. Hence, Mr. Saj, a relative of key management personnel should be identified as relative as at the closing date i.e. on 31.3.2017.

## Answer

(d) (i) AS 29 "Provisions, Contingent Liabilities and Contingent Assets" provides) that when an enterprise has a present obligation, as a result of past events, that probably requires an outflow of resources and a reliable estimate can be made of the amount of obligation, a provision should be recognised.
Tun Ltd. has the obligation to deliver the goods within the scheduled time as per the contract. It is probable that Tun Ltd. will fail to deliver the goods within the schedule and it is also possible to estimate the amount of compensation. Therefore, Tun Ltd. should provide for the contingency amounting Rs. 1.5 crores as per AS 29.
(ii) Provision should not be measured as the excess of compensation to be) paid over the profit. The goods were not manufactured before 31st March, 2016 and no profit had accrued for the financial year 2015-2016. Therefore, provision should be made for the full amount of compensation amounting Rs. 1.50 crores.

## Working Note:

1. Arrear dividend to Preference Shareholders

Preference Share Capital Rs. 500,000 @ 9\% will yield dividend of Rs. 45,000/- per year and for 3 years = Rs. 1,35,000/-. Out of this only $10 \%\}\{\mathbf{1 / 2} \mathbf{~ M \}}$ is paid and the balance is waived off. Hence, amount paid = Rs. 13,500/-
2. Profit on redemption of own debentures

Own Debentures with Nominal Value of Rs. 80,000 sold for Rs. 98 per deb $=80,000 * 98 / 100=$ Rs. 78,400/-.
Book Value = Rs. 1,92,000/ 2,00,000 X 80,000 = Rs. 76,800/-. Profit on own debentures sold = Rs. 78,400 - Rs. 76,800 = Rs. 1,600
Balance Own Debentures = Rs. 1,92,000-76,800 = Rs. 1,15,200 which are cancelled.

## Answer 3:

(a) The losses applicable to the minority in a consolidated subsidiary may exceed the minority interest in the equity of the subsidiary. The excess, and any further losses applicable to the minority, are adjusted against the majority interest except to the extent that the minority has a binding obligation to, and is able to, make good the losses. If the subsidiary subsequently reports profits, all such profits are allocated to the majority interest until the minority's share of losses previously absorbed by the majority has been recovered. Accordingly,

## Answer 6:

(a) Calculation of Total Remuneration payable to Liquidator

|  |  | Amount in <br> Rs. |
| :--- | ---: | ---: |
| $2 \%$ on Assets realised | $(50,00,000 \times 2 \%)$ | $\mathbf{1 , 0 0 , 0 0 0}$ |
| $3 \%$ on payment made to Preferential <br> creditors | $(1,50,000 \times 3 \%)$ | $\mathbf{4 , 5 0 0}$ |
| $3 \%$ on payment made to Unsecured creditors <br> (Refer W.N) |  | $\mathbf{4}$ item <br> $\mathbf{x 1 / 2}$ |
| Total Remuneration payable to Liquidator |  | $\mathbf{1 , 8 3 , 0 1 0}$ |

## Working Note:

Liquidator's remuneration on payment to unsecured creditors =
Cash available for unsecured creditors after all payments including liquidation expenses, payment to secured creditors, preferential creditors \& liquidator's $\}$ remuneration
$=$ Rs. $50,00,000-$ Rs. $50,000-$ Rs. 20,00,000 - Rs. 1,50,000 - Rs. 1,00,000 - Rs. 4,500
= Rs. 26,95,500
Since cash balance is available for unsecured creditors, Liquidator's remuneration on payment to unsecured creditors = Rs. $26,95,500 \times 3 / 103=$ Rs. 78,510 (rounded off)

## Answer:

(b) In accordance with the Schedule III, an investment realizable within 12 months from the reporting date is classified as a current asset. Such realisation should be in the form of cash or cash equivalents, rather than through conversion of one asset into another non-current asset. Hence, company must classify such an investment as a non-current asset, unless it expects to sell the preference shares or the equity shares on conversion and realise cash within 12 months.

## Answer:

(c) Revalued net assets of Zed Ltd. as on 31st March, 2017

|  | Rs. in lakhs | Rs. in lakhs |
| :--- | ---: | ---: |
| Fixed Assets $[120 \times 120 \%]$ |  | $\mathbf{1 4 4 . 0}$ |
| Investments $[55 \times 90 \%]$ |  | $\mathbf{4 9 . 5}$ |
| Current Assets |  | $\mathbf{1 5 . 0}$ |
| Loans and Advances |  | $\mathbf{2 7 8 . 5}$ |
| Total Assets after revaluation |  |  |
| Less: $15 \%$ Debentures | 90.0 | $\mathbf{5 0 . 0}$ |
| Current Liabilities | $\mathbf{1 4 0 . 0}$ |  |
| Equity / Net Worth |  | $\mathbf{1 3 8 . 5}$ |
| Exe Ltd.'s share of net assets (70\% of 138.5) |  | $\mathbf{9 6 . 9 5}$ |
| Exe Ltd.'s cost of acquisition of shares of Zed Ltd. |  | $\mathbf{6 3 . 0 0}$ |
| (Rs.70 lakhs - Rs.7 lakhs*) |  | $\mathbf{3 3 . 9 5}$ |
| Capital reserve |  |  |

* Total Cost of 70 \% Equity of Zed Ltd

Purchase Price of each share
Number of shares purchased [70 lakhs /Rs. 20]
Dividend @ 20 \% i.e. Rs. 2 per share

Rs. 70 lakhs $\}\{\mathbf{1 / 2} \mathbf{~ M \}}$
Rs. 20$\}\{\mathbf{1 / 2} \mathbf{~ M \}}$
3.5 lakhs \}\{1/2 M\}

Rs. 7 lakhs \}\{1/2 M\}

Since dividend received is for pre-acquisition period, it has been reduced from the $\}\{\mathbf{1 / 2} \mathbf{M}\}$ cost of investment in the subsidiary company.
