## Working :

1. Invoice Price per Box $=\frac{1,68,000}{700}=240$
2. Abnormal Loss
$50 \times 200 \quad=10,000$
Add: $\frac{14,000}{700} \times 50 \quad=\quad \underline{1,000}$
11,000
3. Calculation of Consignment Stock

No. of unsold box (700-50-500) = 150 Box
I. Price of 150 Box $(150 \times 240)=36,000$

Add: Consignor Exp.

$$

(b) Advantage of Subsidiary Books

The use of subsidiary books affords the undermentioned advantages:
(i) Division of work: Since in the place of one journal there will be so many subsidiary books, the accounting work may be dividend amongst a number of clerks.
(ii) Specialization and efficiency: When the same work is allotted to a particular person over a period of time, he acquires full knowledge of it and becomes efficient in handling it. Thus the accounting work will be done efficiently.
(iii) Saving of the time: Various accounting processes can be undertaken simultaneously because of the use of a number of books. This will lead to the work being completed quickly.
(iv) Availability of information: Since a separate register or book is kept for each class of transactions, the information relating to each transactions will be available at one place.
(v) Facility in checking: When the trial balance does not agree, the location of the error or errors is facilitated by the existence of separate books. Even the commission of errors and frauds will be checked by the use of various subsidiary books.
