|  | Integral Foreign Operation | Non-Integral Foreign Operation (NFO) |
| :---: | :---: | :---: |
| Meaning | It is a foreign operation, the activities of which are an integral part of those of the reporting enterprise. | It is a foreign operation that is not an integral Foreign Operation. |
| Business | The business of IFO is carried on as if it were an extension of the reporting enterprise's operations. | The business of NFO is carried on in a substantially independent manner by accumulating cash and other monetary items, incurring expenses, generating income and arranging borrowings, in its local currency. |
| Example | Sale of goods imported from the reporting enterprise and remittance of proceeds to the reporting enterprise. | Production in a foreign country out of resources available in such nation independent of the reporting enterprise. |
| Currencies operated | Generally, IFO carries on business in a single foreign currency, i.e. of the country where it is located. | NFO business may also enter into transactions in foreign currencies, including transactions in the reporting currency. |
| Cash flows from operations | Cash flows from operations of the reporting enterprise are directly and immediately affected by a change in the exchange rate between the reporting currency and the currency in the country of IFO. | Change in the exchange rate between the reporting currency and the local currency, has little or no direct effect on the present and future Cash Flows from Operations of either the NFO or the reporting enterprise. |
| Effect of Change in Exchange Rate | Change in the exchange rate affects the individual monetary items held by the IFO rather than the reporting enterprise's Net Investment in the IFO. | Change in the exchange rate affects the reporting enterprise's net investment in the NFO rather than the individual monetary and nonmonetary items held by that NFO. |
