## PAPER : COSTING

Answer to questions are to be given only in English except in the case of candidates who have opted for Hindi Medium. If a candidate who has not opted for Hindi Medium. His/her answer in Hindi will not be valued.

Question No. 1 is compulsory.
Candidates are also required to answer any Four questions from the remaining Five Questions.
In case, any candidate answers extra question(s)/sub-question(s) over and
above the required number, then only the requisite number of questions first answered in the answer book shall be valued and subsequent extra question(s) answered shall be ignored.
Wherever necessary, suitable assumptions may be made and disclosed by way of note.

## Answer 1:

(a) (i) Calculation of Overhead Recovery Rate:

Working Note:
Calculation of Factory Cost in 2019-20

| Particulars | Amount (Rs.) |
| :--- | ---: |
| Opening Stock of Material | $15,00,000$ |
| Add: Purchase of Material | $1,80,50,000$ |
| Less: Closing Stock of Material | $(20,00,000)$ |
| Material Consumed | $1,75,50,000$ |
| Direct Labour | $90,50,000$ |
| Prime Cost | $\mathbf{2 , 6 6 , 0 0 , 0 0 0}$ |
| Factory Overhead | $30,80,000$ |
| Factory Cost | $\mathbf{2 , 9 6 , 8 0 , 0 0 0}$ |
| $\mathbf{( b o l d ~ \mathbf { 3 / 4 }} \mathbf{~ M )}$ |  |

(ii) Job Cost Sheet for the order received in 2020-21

| Particulars | Amount (Rs.) |
| :--- | ---: |
| Material | $\mathbf{8 0 , 0 0 , 0 0 0}$ |
| Labour | $\mathbf{4 0 , 5 0 , 0 0 0}$ |
| Factory Overhead (34\% of Rs. 40,50,000) | $\mathbf{1 3 , 7 7 , 0 0 0}$ |
| Factory Cost | $\mathbf{1 , 3 4 , 2 7 , 0 0 0}$ |
| Administrative Overhead (6.91\% of Rs. 1,34,27,000) | $\mathbf{9 , 2 7 , 8 0 6}$ |
| Cost of delivery | $\mathbf{4 , 5 0 , 0 0 0}$ |
| Total Cost | $\mathbf{1 , 4 8 , 0 4 , 8 0 6}$ |
| Add: Profit @ 25\% of Sales or 33.33\% of cost | $\mathbf{4 9 , 3 4 , 9 3 5}$ |
| Sales value (Price to be quoted for the order) | $\mathbf{1 , 9 7 , 3 9 , 7 4 1}$ |
| Hence the price to be quoted is Rs. $1,97,39,741$. | (bold $\mathbf{1 / 4}$ each) | Known for Best Resull

## Answer:

## (b) Statement Showing Profit on Sale of 90,000 units

|  | (Rs.) | (Rs.) |
| :--- | ---: | ---: |
| Selling Price per unit |  | $\mathbf{8 0}$ |
| Less: Variable Cost per unit |  |  |
| Material | $\mathbf{3 2}$ |  |
| Conversion Cost | $\mathbf{2 4}$ |  |
| Dealers' Margin | $\mathbf{8}$ | $\mathbf{6 4}$ |
| Contribution per unit |  | $\mathbf{1 6}$ |
| Total Contribution (90,000 units $\times$ Rs. 16 ) |  | $\mathbf{1 4 , 4 0 , 0 0 0}$ |
| Less: Fixed Cost |  | $\mathbf{1 0 , 0 0 , 0 0 0}$ |
| Profit | $\mathbf{4 , 4 0 , 0 0 0}$ |  |
| (bold $\mathbf{1 / 4}$ each) |  |  |

In both the proposed suggestions, the fixed costs remain unchanged. Therefore, the present profit of Rs. $4,40,000$ can be maintained by maintaining the total contribution at the present level i.e. Rs. 14,40,000.

## Conclusion:

The second proposal, i.e., increasing the Dealer's Margin, is recommended because:

1. The contribution per unit is higher which is Rs. 14.40 in comparison to Rs. 12.40 in the first proposal; and $\}(\mathbf{1 / 8} \mathbf{~ M})$
2. The sales (in units) required to earn the same level of profit are lower. They are at $1,00,000$ units as against $1,16,129$ units in the first proposal. This means a lower sales effort and less finance would be required for implementing proposal (ii) as against proposal (i). Of course, under proposal (ii) the company can earn higher profits than at present level if it can increase its sales beyond 1,00,000 units. $\}(\mathbf{1 / 8} \mathbf{~ M})$ Known for Best resull

## Answer:

(c) (i) Statement of cost allocation to each product from each activity

|  | Product |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | M (Rs.) | S (Rs.) | T (Rs.) | Total (Rs.) |
| Power (Refer to working note) | $\begin{array}{r} 40,000 \\ (10,000 \mathrm{kWh} \\ \times \text { Rs. } 4) \end{array}$ | $\begin{array}{r} 80,000 \\ (20,000 \mathrm{kWh} \\ \times \text { Rs. } 4) \end{array}$ | $\begin{array}{r} 60,000 \\ (15,000 \mathrm{kWh} \\ \times \text { Rs. } 4) \end{array}$ | 1,80,000 |
| Quality Inspections (Refer to working note) | $1,05,000$ $(3,500$ inspections $\times$ Rs. 30$)$ | 75,000 $(2,500$ inspections $\times$ Rs. 30$)$ | 90,000 $(3,000$ inspections $\times$ Rs. 30$)$ | 2,70,000 |

(1/4 M each Bold)
Working note
Rate per unit of cost driver:

| Power | (Rs. 2,00,000 / 50,000 kWh) | Rs. 4/kWh |
| :--- | :--- | :--- |
| Quality Inspection | (Rs. 3,00,000 / 10,000 <br> inspections) | Rs. 30 per inspection |

(1/4 M each Bold)
(i) Computation of cost of unused capacity for each activity:

|  | (Rs.) |
| :--- | :---: |
| Power (Rs. 2,00,000 - Rs. 1,80,000) or 5,000 x 4 | $\mathbf{2 0 , 0 0 0}$ |
| Quality Inspections (Rs. 3,00,000 - Rs. 2,70,000) or 1,000 x 30 | $\mathbf{3 0 , 0 0 0}$ |
| Total cost of unused capacity | $\mathbf{5 0 , 0 0 0}$ |

(1/4 M each Bold)
(ii) Factors management consider in choosing a capacity level to compute the budgeted fixed overhead cost rate:

Effect on product costing \& capacity management

- Effect on pricing decisions.
- Effect on performance evaluation
- Effect on financial statements
- Regulatory requirements.
- Difficulties in forecasting.
(1/8 M each Bold)

## Answer:

(d)

|  | (Rs. ) |
| :--- | ---: |
| Wages paid to worker during the year $\{($ Rs. $10,000+2,000) \times 12\}$ | $\mathbf{1 , 4 4 , 0 0 0}$ |
| Add: Employer Contribution to: |  |
| Provident Fund @ $10 \%$ | $\mathbf{1 4 , 4 0 0}$ |
| E.S.I. Premium @ 4.75\% (6.5 - 1.75) | $\mathbf{6 , 8 4 0}$ |
| Bonus at 2 months' wages (Basic + DA) | $\mathbf{2 4 , 0 0 0}$ |
| Total | $\mathbf{1 , 8 9 , 2 4 0}$ |

(3/4 M each Bold)
Effective hours per year: 285 days $\times 8$ hours $=\mathbf{2 , 2 8 0}$ hours
(1/2M Bold)
Wage-rate per hour (for costing purpose): Rs. 1,89,240/2,280 hours = Rs. $\mathbf{8 3}$
(3/4 M Bold) Enown for Best Resull

## Answer 2:

(a) (a) Calculation of Raw Material inputs during the month:

| Quantities Entering Process | Litres | Quantities Leaving <br> Process | Litres |
| :--- | ---: | :--- | ---: |
| Opening WIP | 800 | Transfer to Finished Goods | 4,200 |
| Raw material input (balancing <br> figure) | $\mathbf{5 , 3 6 0}$ | Process Losses | 1,800 |
|  |  | Closing WIP | 160 |
|  | 6,160 |  | 6,160 |

(1.5 M Bold)

## (b) Calculation of Normal Loss and Abnormal Loss/Gain

|  | Litres |
| :--- | ---: |
| Total process losses for month | $\mathbf{1 , 8 0 0}$ |
| Normal Loss (10\% input) | $\mathbf{5 3 6}$ |
| Abnormal Loss (balancing figure) | $\mathbf{1 , 2 6 4}$ |

(1/8 M each Bold)
(c) Calculation of values of Raw Material, Labour and Overheads added to the process:

|  | Material | Labour | Overheads |
| :--- | ---: | ---: | ---: |
| Cost per equivalent unit | Rs. 23.00 | Rs. 7.00 | Rs. 9.00 |
| Equivalent units (litre) <br> (refer the working note) | $\mathbf{4 , 8 2 4}$ | $\mathbf{4 , 9 5 2}$ | $\mathbf{5 , 0 1 6}$ |
| Cost of equivalent units | Rs. 1,10,952 | Rs. 34,664 | Rs. 45,144 |
| Add: Scrap value of normal loss <br> $(536$ units $\times$ Rs. 15) | Rs. 8,040 | -- | -- |
| Total value added | Rs. 1,18,992 | Rs. 34,664 | Rs. 45,144 |

(1/8 M each Bold)

## Workings:

Statement of Equivalent Units (litre):

| Input Details | Units | Output details | Units | Equivalent Production |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | Material |  | Labour |  | Overheads |  |
|  |  |  |  | Units | (\%) | Units | (\%) | Units | (\%) |
| Opening WIP | 800 | Units completed: |  |  |  |  |  |  |  |
| Units | 5,360 | - Opening WIP | 800 | -- | - | 240 | 30 | 320 | 40 |
|  |  | - Fresh inputs | 3,400 | 3,400 | 100 | 3,400 | 100 | 3,400 | 100 |
|  |  | - Normal loss | 536 | -- | -- | -- | -- | -- | -- |
|  |  | - Abnormal loss | 1,264 | 1,264 | 100 | 1,264 | 100 | 1,264 | 100 |
|  |  | - Closing WIP | 160 | 160 | 100 | 48 | 30 | 32 | 20 |
|  | 6,160 |  | 6,160 | 4,824 |  | 4,952 |  | 5,016 |  |

(1/8 M each Bold)
(d) Process Account for Month

|  | Litres | Amount <br> (Rs.) |  | Litres | Amount <br> (Rs.) |
| :--- | ---: | ---: | :--- | ---: | ---: |
| To Opening WIP | $\mathbf{8 0 0}$ | $\mathbf{2 6 , 6 4 0}$ | By Finished goods | $\mathbf{4 , 2 0 0}$ | $\mathbf{1 , 6 3 , 8 0 0}$ |
| To Raw Materials | $\mathbf{5 , 3 6 0}$ | $\mathbf{1 , 1 8 , 9 9 2}$ | By Normal loss | $\mathbf{5 3 6}$ | $\mathbf{8 , 0 4 0}$ |
| To Wages | -- | $\mathbf{3 4 , 6 6 4}$ | By Abnormal loss | $\mathbf{1 , 2 6 4}$ | $\mathbf{4 9 , 2 9 6}$ |
| To Overheads | -- | $\mathbf{4 5 , 1 4 4}$ | By Closing WIP | $\mathbf{1 6 0}$ | $\mathbf{4 , 3 0 4}$ |
|  | $\mathbf{6 , 1 6 0}$ | $\mathbf{2 , 2 5 , 4 4 0}$ |  | $\mathbf{6 , 1 6 0}$ | $\mathbf{2 , 2 5 , 4 4 0}$ |

(1/8 M each Bold)

## Answer:

(b)
(i) Material Cost Variance $(A+B)$
Rs. 3,625

$$
(S Q \times S P)
$$

$$
\left(\mathrm{SQ}_{\mathrm{A}} \times \mathrm{SP}_{\mathrm{A}}\right)+\left(\mathrm{SQ}_{\mathrm{B}} \times \mathrm{SP}_{\mathrm{B}}\right)
$$

$$
\left(940 \mathrm{~kg} \times \mathrm{SP}_{\mathrm{A}}\right)+(705 \mathrm{~kg} \times \mathrm{Rs} .30)
$$

$$
\left(940 \mathrm{~kg} \times \mathrm{SP}_{\mathrm{A}}\right)+\mathrm{Rs} .21,150
$$

$$
\left(940 \mathrm{~kg} \times \mathrm{SP}_{\mathrm{A}}\right)
$$

$$
\mathrm{SP}_{\mathrm{A}} \quad=\underline{\text { Rs. } 42,300}
$$

$$
\begin{aligned}
& =\{(S Q \times S P)-(A Q \times A P)\} \\
& =(S Q \times S P)-\text { Rs. } 59,825 \\
& =\text { Rs. } 63,450 \\
& =\text { Rs. } 63,450 \\
& =\text { Rs. } 63,450 \\
& =\text { Rs. } 63,450 \\
& =\text { Rs. } 42,300 \\
& =\frac{\text { Rs. } 42,300}{940 \mathrm{~kg}}
\end{aligned}
$$

## Standard Price of Material-A = Rs. 45 \}(2 M Bold)

## Working Note:

SQ i.e. quantity of inputs to be used to produce actual output

(iv) Total Actual Quantity of Material-A and Material-B

$$
\begin{aligned}
=A Q_{A}+A Q_{B} & =900 \mathrm{~kg}+650 \mathrm{~kg}(\text { from (ii) above) } \\
& =1,550 \mathrm{~kg} \\
\text { Now, } \quad & =\frac{800 \mathrm{~kg}}{(800+600)} \times 1,550 \mathrm{~kg}=\mathbf{8 8 6} \mathbf{~ k g} \\
\text { Revised } \mathrm{SQ}_{\mathrm{A}} & \\
\text { Revised } \mathrm{SQ}_{\mathrm{B}} & =\frac{600 \mathrm{~kg}}{(800+600)} \times 1,550 \mathrm{~kg}=\mathbf{6 6 4} \mathbf{~ k g}
\end{aligned}
$$

(1 M Each Bold)
(v) Material Mix Variance $(A+B)=\{(R S Q \times S P)-(A Q \times S P)\}$

$$
\begin{aligned}
& =\left\{\left(R S Q_{A} \times S P_{A}\right)+\left(R S Q_{B} \times S P_{B}\right)-60,000\right\} \\
& =(886 \mathrm{~kg}(\text { from (iv) above) } \times \text { Rs. } 45 \text { (from (i) above) }) \\
& +(664 \mathrm{~kg}(\text { from (iv) above) } \times \text { Rs. } 30)-\text { Rs. } 60,000 \\
& =(39,870+19,920)-60,000=\text { Rs. } \mathbf{2 1 0}(\mathbf{A})\}(\mathbf{2} \mathbf{M} \text { Bold })
\end{aligned}
$$

Answer 3:
(a) Working Notes:
(a) Annual purchase quantity for material X and Y :

Annual demand for product $M-20,000$ units $\times 4=80,000$ units

| Particulars | Mat-X | Mat-Y |
| :--- | ---: | ---: |
| Quantity required for per unit of product M | 3 kg. | 4 kg. |
| Net quantity for materials required | $2,40,000 \mathrm{~kg}$. | $3,20,000 \mathrm{~kg}$. |
| Add: Loss in transit | - | $6,881 \mathrm{~kg}$. |
| Add: Loss in process | $10,000 \mathrm{~kg}$. | $17,204 \mathrm{~kg}$. |
| Purchase quantity | $\mathbf{2 , 5 0 , 0 0 0} \mathbf{~ k g .}$ | $\mathbf{3 , 4 4 , 0 8 5} \mathbf{~ k g .}$ |

Note- Input credit on GST paid is available; hence, it will not be included in cost of material. \}(1/4 M Bold)
(i) Calculation of cost per kg. of material $X$ and $Y$ :

| Particulars | Mat-X | Mat-Y |
| :--- | ---: | ---: |
| Purchase quantity | $\mathbf{2 , 5 0 , 0 0 0} \mathbf{~ k g .}$ | $\mathbf{3 , 4 4 , 0 8 5} \mathbf{~ k g .}$ |
| Rate per kg. | Rs. $\mathbf{1 4 0}$ | Rs. 640 |
| Purchase price | Rs. 3,50,00,000 | Rs. 22,02,14,400 |
| Add: Freight | 0 | Rs. 9,80,000* |
| Total cost | Rs. 3,50,00,000 | Rs. 22,11,94,400 |
| Net Quantity | $\mathbf{2 , 4 0 , 0 0 0} \mathbf{~ k g . ~}$ | $\mathbf{3 , 2 0 , 0 0 0} \mathbf{~ k g}$ |
| Cost per kg. | Rs. 145.83 | Rs. 691.23 |

(1/4 M Each Bold)
*No. of trucks $=\frac{3,44,085 \mathrm{~kg} .}{10 \text { ton } \times 1,000}=34.40$ trucks or 35 trucks
(1/4 M Bold)
Therefore, total freight $=35$ trucks $\times$ Rs. $28,000=$ Rs. 9,80,000
(1/4 M Bold)
(i) Calculation of Economic Order Quantity (EOQ) for Mat.-X and Y:
$\mathrm{EOQ}=\sqrt{\frac{2 \times \text { Annual Requirement } \times \text { Order cost }}{\text { Carrying cost per unit p.a. }}}$

| Particulars | Mat-X | Mat-Y |
| :--- | ---: | ---: |
| Annual Requirement | $2,50,000 \mathrm{~kg}$. | $3,44,085 \mathrm{~kg}$. |
| Ordering cost | 0 | Rs. 28,000 |
| Cost per unit | Rs. 145.83 | Rs. 691.23 |
| Carrying cost | $15 \%$ | $15 \%$ |
| Carrying cost per unit p.a. | $0^{*}$ | Rs. 103.68 |
| EOQ | $\mathbf{0}$ | $\mathbf{1 3 , 6 3 2 . 6 2 ~ k g . ~}$ |
| $\mathbf{( 2 . 5 ~ M ~ E a c h ~ B o l d ) ~}$ |  |  |

## Answer:

(b) Effective Machine hour for four-week period
$=$ Total working hours - unproductive set-up time
$=\{(48$ hours $\times 4$ weeks $)-\{(4$ hours $\times 4$ weeks $)\}$
$=(192-16)$ hours $)=\mathbf{1 7 6}$ hours. $\}(\mathbf{1 . 5} \mathbf{~ M ~ B o l d})$
(i) Computation of cost of running one machine for a four week period

|  |  | (Rs.) | (Rs.) |
| :---: | :---: | :---: | :---: |
| (A) | Standing charges (per annum) |  |  |
|  | Rent | 5,400.00 |  |
|  | Heat and light Forman's | 9,720.00 |  |
|  | Salary | 12,960.00 |  |
|  | Other miscellaneous expenditure | 18,000.00 |  |
|  | Standing charges (per annum) | 46,080.00 |  |
|  | Total expenses for one machine for four week period $\left(\frac{₹ 46,080}{\text { 3machines } \times 13 \text { four }- \text { week period }}\right)$ |  | 1,181.54 |
|  | Wages ( 48 hours $\times 4$ weeks $\times$ Rs. $20 \times$ 3 operators) |  | 11,520.00 |
|  | Bonus $\{(176$ hours $\times$ Rs. $20 \times 3$ operators) $\times 10 \%$ \} |  | 1,056.00 |
|  | Total standing charges |  | 13,757.54 |
| (B) | Machine Expenses |  |  |
|  | Depreciation $=\left(₹ 52,000 \times 10 \% \times \frac{1}{13 \text { four }- \text { weekperiod }}\right)$ |  | 400.00 |
|  | Repairs and maintenance (Rs. $60 \times 4$ weeks) |  | 240.00 |
|  | Consumable stores (Rs. $75 \times 4$ weeks) |  | 300.00 |
|  | Power (176 hours $\times 20$ units $\times$ Rs. 0.80 ) |  | 2,816.00 |
|  | Total machine expenses |  | 3,756.00 |
| (C) | Total expenses (A) + (B) |  | 17,513.54 |

(1/2 M Each Bold)
(ii) Machine hour rate $\left.=\frac{₹ 17,513.54}{176 \text { hours }}=₹ 99.51\right\}(\mathbf{1} \mathbf{~ M ~ B o l d})$ Known for Best Resilin

## Answer 4:

## Answer:

(b) (i) Statement showing allocation of Joint Cost

| Particulars | B1 | B2 |
| :--- | ---: | ---: |
| No. of units Produced | $\mathbf{1 , 8 0 0}$ | $\mathbf{3 , 0 0 0}$ |
| Selling Price Per unit (Rs.) | $\mathbf{4 0}$ | $\mathbf{3 0}$ |
| Sales Value (Rs.) | $\mathbf{7 2 , 0 0 0}$ | $\mathbf{9 0 , 0 0 0}$ |
| Less: Estimated Profit (B1 -20\% \& B2 -30\%) | $\mathbf{( 1 4 , 4 0 0 )}$ | $\mathbf{( 2 7 , 0 0 0 )}$ |
| Cost of Sales | $\mathbf{5 7 , 6 0 0}$ | $\mathbf{6 3 , 0 0 0}$ |
| Less: Estimated Selling Expenses (B1 -15\% \& B2 -15\%) | $\mathbf{( 1 0 , 8 0 0 )}$ | $\mathbf{( 1 3 , 5 0 0 )}$ |
| Cost of Production | $\mathbf{4 6 , 8 0 0}$ | $\mathbf{4 9 , 5 0 0}$ |
| Less: Cost after separation | $\mathbf{( 3 5 , 0 0 0 )}$ | $\mathbf{( 2 4 , 0 0 0 )}$ |
| Joint Cost allocated | $\mathbf{1 1 , 8 0 0}$ | $\mathbf{2 5 , 5 0 0}$ |

(ii) Statement of Profitability

| Particulars | M1 (Rs.) | B1 (Rs.) | B2 (Rs.) |
| :---: | :---: | :---: | :---: |
| Sales Value (A) | $\begin{array}{r} \text { 4,00,000 } \\ (4,000 \times \text { Rs.100 }) \end{array}$ | 72,000 | 90,000 |
| Less:- Joint Cost | $\begin{array}{r} 1,75,100 \\ (2,12,400-11,800- \\ 25,500) \end{array}$ | 11,800 | 25,500 |
| Cost after separation |  | 35,000 | 24,000 |
| - Selling Expenses (M1-20\%, B1-15\% \& B2-15\%) | 80,000 | 10,800 | 13,500 |

| Profit | $(B)$ | $\mathbf{2 , 5 5 , 1 0 0}$ | $\mathbf{5 7 , 6 0 0}$ | $\mathbf{6 3 , 0 0 0}$ |
| :--- | :--- | ---: | ---: | ---: |
|  | $(A-B)$ | $\mathbf{1 , 4 4 , 9 0 0}$ | $\mathbf{1 4 , 4 0 0}$ | $\mathbf{2 7 , 0 0 0}$ |

(1/4 M Each Bold)
Overall Profit = Rs. $1,44,900$ + Rs. 14,400 + Rs. $27,000=$ Rs. $\mathbf{1 , 8 6 , 3 0 0}$
(1.25 M Underline Bold)

## Answer 5:

(a) Calculation of Cost per annum

| Particulars | Arts <br> (Rs.) | Commerce <br> (Rs.) | Science <br> (Rs.) | Total <br> (Rs.) |
| :--- | ---: | ---: | ---: | ---: |

(1/10 M Each Bold)

Working Notes:
(1) Teachers' salary

| Particulars | Arts | Commerce | Science |
| :--- | ---: | ---: | ---: |
| No. of teachers | 4 | 5 | 6 |
| Salary per annum (Rs.) (Rs. $35,000 \times 12)$ | $4,20,000$ | $4,20,000$ | $4,20,000$ |
| Total salary | $16,80,000$ | $21,00,000$ | $25,20,000$ |

(2) Re-apportionment of Economics and Mathematics teachers' salary

|  | Economics |  | Mathematics |  |
| :--- | ---: | ---: | ---: | ---: |
| Particulars | Arts |  | Commerce | Science |
| Commerce |  |  |  |  |
| No. of classes | 832 | 208 | 940 | 160 |
| Salary re- apportionment <br> (Rs.) | $(84,000)$ | 84,000 | $(61,091)$ | 61,091 |
|  | $\left(\frac{\text { Rs. } 4,20,000}{1,040} \times 208\right.$ | $\left(\frac{\text { Rs. } 4,20,000}{1,100} \times 160\right)$ |  |  |

(3) Principal's salary has been apportioned on the basis of time spent by him for administration of classes.
(4) Lab attendants' salary has been apportioned on the basis of lab classes attended by the students.
(5) Salary of library staffs are apportioned on the basis of time spent by the students in library.
(6) Salary of Peons are apportioned on the basis of number of students. The peons' salary allocable to higher secondary classes is calculated as below:

|  | Amount (Rs.) |
| :--- | ---: |
| Peon dedicated for higher secondary | $1,20,000$ |
| $(1$ peon $\times$ Rs. $10,000 \times 12$ months $)$ | 54,000 |
| Add: $15 \%$ of other peons' salary |  |
| $\{15 \%$ of $(3$ peons $\times$ Rs. $10,000 \times 12$ months $)\}$ | $1,74,000$ |
|  |  |

(7) Salary to other staffs, office \& administration cost, Annual day expenses and sports expenses are apportioned on the basis of number of students.
(8) Examination expenditure has been apportioned taking number of students into account (It may also be apportioned on the basis of number of examinations).
(W. Note : 1, 2, 6 = 1/3 M EACH) (W. Note: 3, 4, 5, 7, 8 = 1/10 M EACH)

## Answer:

(b) Break- even point (in units) is $50 \%$ of sales i.e. 12,000 units.

Hence, Break- even point (in sales value) is 12,000 units $\times$ Rs. $200=$ Rs. 24,00,000.
(i) We know that Break even sales $=\frac{\text { Fixed Cost }}{P / V \text { ratio }}$

Or, Rs. 24,00,000

$$
\begin{aligned}
& \quad=\frac{\text { Fixed Cost }}{25 \%} \\
& =\text { Rs. } 24,00,000 \times 25 \% \\
& =\text { Rs. } 6,00,000
\end{aligned}
$$

Or, Fixed Cost = Rs. $24,00,000 \times 25 \%$
So Fixed Cost for the year is Rs. 6,00,000 \} ( $\mathbf{2} \mathbf{~ M ~ B o l d ) ~}$
(ii) Contribution for the year $=(24,000$ units $\times$ Rs. 200 $) \times 25 \%$

$$
=\text { Rs. } 12,00,000
$$

Profit for the year $=$ Contribution - Fixed Cost
$=$ Rs. 12,00,000 - Rs. 6,00,000
$=$ Rs. 6,00,000 \} ( $\mathbf{2} \mathbf{M}$ Bold)
(iii) Target net profit is Rs. 11,00,000

Hence, Target contribution $=$ Target Profit + Fixed Cost
$=$ Rs. $11,00,000+$ Rs. $6,00,000$
$=$ Rs. $17,00,000$

Contribution per unit $=25 \%$ of Rs. $200=$ Rs. 50 per unit
No. of units $=\frac{R s .17,00,000}{R s .50 \text { per unit }}=34,000$ unit $\quad \mathbf{~ ( ~} \mathbf{2} \mathbf{M}$ for 34,000 Units)
So, 34,000 units to be sold to earn a target net profit of Rs. $11,00,000$ for a year.
(iv) Net desired total Sales (Number of unit $\times$ Selling price) be $x$ then desired profit is $25 \%$ on Cost or $20 \%$ on Sales i.e. $0.2 x$
Desired Sales $=\frac{\text { Fixed } \text { Cost }+ \text { Desired } \operatorname{Pr} \text { ofit }}{P / V \text { ratio }}$
$x \quad=\frac{6,00,000+0.2 x}{25 \%}$
or, $0.25 x=6,00,000+0.2 x$
or, $0.05 x=6,00,000$
or, $x$ = Rs. 1,20,00,000
No. of units to be sold $=\frac{R s .1,20,00,000}{R s .200}=60,000$ unit $\}(\mathbf{2} \mathbf{M}$ for $\mathbf{6 0 , 0 0 0}$ Units)
(v) If Break- even point is to be brought down by 4,000 units then Break-even point will be 12,000 units $-4,000$ units $=8,000$ units
Let Selling price be Rs. $x$ and fixed cost and variable cost per unit remain unchanged i.e. Rs. 6,00,000 and Rs. 150 respectively.
Break even point: Sales revenue $=$ Total cost
$8,000 x=8,000 \times$ Rs. $150+$ Rs. $6,00,000$
Or, 8,000 $x=$ Rs. $12,00,000+$ Rs. $6,00,000$
Or, $x=\frac{R s .18,00,000}{8,000}=$ Rs. 225
$\therefore$ Selling Price should be Rs. 225 \} ( 2 M Bold)
Hence, selling price per unit shall be Rs. 225 if Break-even point is to be brought down by 4,000 units.

## Answer 6:

(a) Difference between Cost Control and Cost Reduction

| Cost Control |  | Cost Reduction |  |
| :--- | :--- | :--- | :--- |
| 1. | Cost control aims at maintaining <br> the costs in accordance with the <br> established standards. | 1. | Cost reduction is concerned with <br> reducing costs. It challenges all <br> standards and endeavours to <br> better them continuously |
| 2. | Cost control seeks to attain lowest <br> possible cost under existing <br> conditions. | 2. | Cost reduction recognises no <br> condition as permanent, since a <br> change will result in lower cost. |
| 3. | In case of Cost Control, emphasis <br> is on past and present | 3. | In case of cost reduction it is on <br> present and future. |
| 4. | Cost Control is a preventive <br> function | 4. | Cost reduction is a corrective <br> function. It operates even when <br> an efficient cost control system <br> exists. |
| 5. | Cost control ends when targets <br> are achieved | 5. | Cost reduction has no visible end. |

## Answer:

(c) Difference between Bin Card \& Stores Ledger

| Bin Card | Stores Ledger |
| :--- | :--- |
| It is maintained by the storekeeper <br> inthe store. | It is maintained in cost accounting <br> department. |
| It contains only quantitative details of <br> material received, issued and returned <br> to stores. | It contains information both in <br> quantityand value. |
| Entries are made when transaction <br> takes place. | It is always posted after the <br> transaction. |
| Each transaction is individually <br> posted. | Transactions may be summarized and <br> then posted. |
| Inter-department transfers do not <br> appear in Bin Card. | Material transfers from one job to <br> another job are recorded for costing <br> purposes. |

(1 M Each Point)

## Answer:

(d) By-product cost can be dealt in cost accounting in the following ways:
(i) When they are of small total value: When the by-products are of small total value, the amount realised from their sale may be dealt in any one the following two ways:

1. The sales value of the by-products may be credited to the Costing Profit and Loss Account and no credit be given in the Cost Accounts. The credit to the Costing Profit and Loss Account here is treated either as miscellaneous income or as additional sales revenue. \}(1 M)
2. The sale proceeds of the by-product may be treated as deductions from the total costs. The sale proceeds in fact should be deducted either from the production cost or from the cost of sales. \}(1 M)
(ii) When the by-products are of considerable total value: Where byproducts are of considerable total value, they may be regarded as joint products rather than as by-products. To determine exact cost of byproducts the costs incurred upto the point of separation, should be apportioned over by-products and joint products by using a logical basis. In this case, the joint costs may be divided over joint products and byproducts by using relative market values; physical output method (at the point of split off) or ultimate selling prices (if sold). \}(1.5 M)
(iii) Where they require further processing: In this case, the net realisable value of the by-product at the split-off point may be arrived at by subtracting the further processing cost from the realisable value of byproducts
If total sales value of by-products at split-off point is small, it may be treated as per the provisions discussed above under (i).
In the contrary case, the amount realised from the sale of by-products will be considerable and thus it may be treated as discussed under (ii). \}(1.5 M)
