**Answer 1:**

**(a) Computation of amount of depreciation as per AS 10**

		Rs.	
(i)	Machinery purchased on 1/4/15 for Rs. 10 lakhs (having residual value of Rs. 10 lakhs) Reason: The company considers that the residual value, based on prices prevailing at the balance sheet date, will equal the cost. Therefore, there is no depreciable amount and depreciation is correctly zero.	Nil	} {1 M}
(ii)	Land (50 lakhs) (considered freehold) Reason: Land has an unlimited useful life and therefore, it is not depreciated.	Nil	
(iii)	Machinery constructed for own use (Rs. 5,00,000/10) Reason: The entity should begin charging depreciation from the date the machine is ready for use i.e. 1st April, 2019. The fact that the machine was not used for a period after it was ready to be used is not relevant in considering when to begin charging depreciation.	50,000	} {1 M}
(iv)	Machinery having revised useful life Reason: The entity has charged depreciation using the straight-line method at Rs. 10,000 per annum i.e. (50,000/5 years). On 1st April, 2019 the asset's net book value is [50,000 – (10,000 x 2)] i.e. Rs. 30,000. The remaining useful life is 2 years as per revised estimate. The company should amend the annual provision for depreciation to charge the unamortized cost over the revised remaining life of 2 years. Consequently, it should charge depreciation for the next 2 years at Rs. 15,000 per annum i.e. (30,000 / 2 years).	15,000	

**Answer:**

**(b)**

		(Rs. in lakhs)

June 2019	Add: Refund of grant*	60.00	
	Revised book value	232.044	

Depreciation @10% on the revised book value amounting to Rs. 232.044 lakhs is to be provided prospectively over the residual useful life of the machinery.

\*considered refund of grant at beginning of June month and depreciation for two months already charged. Alternative answer considering otherwise also possible.

- (c) As per AS 13 (Revised) 'Accounting for Investments, for investment in shares - if the investment is purchased with an intention to hold for short-term period (less than one year), then it will be classified as current investment and to be carried at lower of cost and fair value. } {2 M}
- In the given case Rs. 25,000 shares held as current investment will be carried in the books at Rs. 23,750 (Rs. 47,500/2). } {1 M}
- If equity shares are acquired with an intention to hold for long term period (more than one year), then should be considered as long-term investment to be shown at cost in the Balance Sheet of the company. However, provision for diminution should be made to recognize a decline, if other than temporary, in the value of the investments. Hence, Rs. 25,000 shares held as long-term investment will be carried in the books at Rs. 25,000. } {1 M}
- Gold and silver are generally purchased with an intention to hold them for long term period (more than one year) until and unless given otherwise. } {1 M}
- Hence, the investment in Gold and Silver (purchased on 1<sup>st</sup> March, 2019) should continue to be shown at cost (since there is no 'other than temporary' diminution) as on 31<sup>st</sup> March, 2020. Thus Gold at Rs. 1,00,000 and Silver at Rs. 30,00,000 respectively will be shown in the books. } {1 M}

**Answer:**

- (d) As per AS 16 A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use or sale. Other investments and those inventories that are routinely manufactured or otherwise produced in large quantities on a repetitive basis over a short period of time, are not qualifying assets. Assets that are ready for their intended use or sale when acquired also are not qualifying assets. Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset should be capitalized as part of the cost of that asset. Other borrowing costs should be recognized as an expense in the period in which they are incurred. } {2 M}

Construction of factory shed amounting Rs. 240 lakhs is qualifying asset in the given case. The interest for this amount during the year will be added to the cost of factory shed. All others (purchase of machinery, vehicles and technical know how, working capital, advance for tools/cranes) are non-qualifying assets and related borrowing cost will be charged to Profit and Loss statement. }{ 2 M }

Qualifying Asset as per AS 16 (construction of a shed) = Rs. 240 lakhs  
Borrowing cost to be capitalized = Rs. 40 lakhs x 240/320 = Rs. 30 lakhs  
Interest to be debited to Profit or Loss account: Rs. (40 – 30) = Rs. 10 lakhs. }{ 1 M }

Note: Assumed that construction of factory shed completed on 31<sup>st</sup> March, 2020.

} {1 M}

\* interest not considered.

**Working Notes:**

1. **Debenture Redemption Reserve Investment A/c**  
 The company would be required to invest an amount equivalent to 15% of the value of the debentures in specified investments which would be equivalent to:  
 = Total No of debentures X Face value per debenture X 15%  
 = 8,000 X 100 X 15% = Rs. 1,20,000/-  
 The company has already invested in specified investments i.e. 7% Govt bonds for an amount of Rs. 1,00,000 as per the information given in the question. The balance amount of Rs. 20,000 (i.e. Rs. 1,20,000 less Rs. 1,00,000) would be invested by the company on 1 April 2019.
  2. **Redemption of Debenture Redemption Reserve Investments on 31.3.2020**  
 Since the company purchased 1,000 own debentures on 31 March 2020, the company
- } {1 M}

would also realize the investments of 15% corresponding to these debentures for which computation is as follows:

$$= \text{No of own debentures to be bought} \times \text{Face value per debenture} \times 15\%$$

$$= 1,000 \times 100 \times 15\% = \text{Rs. } 15,000/-$$

The remaining debentures i.e. total debentures less own debentures would be redeemed on 31 March 2020 and hence the company would also realize the balance investments of 15% corresponding to these debentures for which computation is as follows:

$$= (\text{Total no of debentures} - \text{No of own debentures}) \times \text{Face value per debenture} \times 15\% =$$

$$(8,000 - 1,000) \times 100 \times 15\% = \text{Rs. } 1,05,000/-$$

**3. Debenture Redemption Reserve**

The company would be required to transfer an amount equivalent to 10% of the value of the debentures in Debentures Redemption Reserve Account. The value of debentures is 8,00,000 thus 10% of it i.e. 80,000 should be there in DRR a/c. The available balance in DRR a/c is only 50,000 therefore 30,000 (80,000 – 50,000) additional amount will be transferred from General Reserve or Profit and loss A/c to DRR A/c.

		56,000	60,000	8,82,300			56,000	60,000	8,82,300

**Working Notes:**

1. Calculation of no. of bonus shares issued  
 Bonus Shares = (30,000 + 10,000) divided by 4= 10,000 shares

2. Calculation of right shares subscribed

$$\text{Right Shares} = \frac{30,000 \text{ shares} + 10,000 \text{ shares} + 10,000 \text{ shares}}{5}$$

= 10,000 shares

Shares subscribed 10,000 x 60% = 6,000 shares

Value of right shares subscribed = 6,000 shares @ Rs. 12 per share = Rs. 72,000

3. Calculation of sale of right entitlement

Amount received from sale of rights will be 4,000 shares x Rs. 5 per share = Rs. 20,000 and it will be credited to statement of profit and loss.

4. Calculation of profit/loss on sale of shares-
- |                 |                                  |  |
|-----------------|----------------------------------|--|
| Total holding = | 30,000 shares original           |  |

|                 | <u>56,000</u>                    |  |
- 50% of the holdings were sold i.e. 28,000 shares (56,000 x 1/2) were sold.  
 Cost of total holdings of 56,000 shares  
 = Rs. 5,40,000 + Rs. 1,62,400 + Rs. 72,000 – Rs. 20,000 = Rs. 7,54,400  
 Average cost of shares sold would be:
- $$= \frac{7,54,400}{56,000} \times 28,000 = \text{Rs. } 3,77,200$$
- |                                                     |                   |         |

5. Dividend received on investment held as on 1<sup>st</sup> April, 2019  
 = 30,000 shares x Rs. 10 x 20%

 Dividend received on shares purchased on 10<sup>th</sup> June, 2019  
 = 10,000 shares x Rs. 10 x 20% = Rs. 20,000 will be adjusted to Investment A/c } {1 M}
6. Calculation of closing value of shares (on average basis) as on 31<sup>st</sup> March, 2020 } {1 M}

  - 2: Time Ratio = 3:9 = 1:3 } {3/4 M}
  - 3: Purchase Price Ratio
- ∴ Ratio is 3 : 9
- But purchase price was 10% higher in the company period } {3/4 M}
- ∴ Ratio is 3 : 9 + 10%
- 3:9.9 = 1:3.3.

Interest on debentures	31,240		
Depreciation on fixed assets as per Schedule II	5,75,345	<b>(15,63,907)</b>	
Profit u/s 198		<b>27,35,383</b>	

} {5 item  
x 1/2 M}

Maximum Managerial remuneration under Companies Act, 2013 = 11% of Rs. 27,35,383 = Rs. 3,00,892 }{1 1/2 M}

**Answer 6:**

- (a) Financial capital maintenance at historical cost: Under this convention, opening and closing assets are stated at respective historical costs to ascertain opening and closing equity. If retained profit is greater than or equals to zero, the capital is said to be maintained at historical costs. This means the business will have enough funds to replace its assets at historical costs. This is quite right as long as prices do not rise. Maximum amount withdrawn by Kishore in year 2019-20 if Financial capital is maintained at historical cost }{2 M}

Particulars	Financial Capital Maintenance at Historical Cost (Rs.)
Closing equity (Rs. 30 x 75,000 units)	22,50,000 represented by cash
Opening equity	75,000 units x Rs. 20 = 15,00,000
Permissible drawings to keep Capital intact	7,50,000 (22,50,000 – 15,00,000)

}{2 M}

Thus Rs. 7,50,000 is the maximum amount that can be withdrawn by Kishore in year 2019-20 if Financial capital is maintained at historical cost. }{1 M}

**Answer:**

- (b)

**Calculation of net profit u/s 198 of the Companies Act, 2013**

	Rs.	Rs.
Balance from Trading A/c		38,15,890
Add: Subsidies received from Government		2,50,000
		40,65,890
Less: Administrative, selling and distribution expenses (4,99,200 + 1,18,200 + 95,225)	7,12,625	
Director's fees	1,35,940	
Interest on debentures	28,460	
Depreciation on fixed assets as per Schedule II	5,15,675	(13,92,700)
Profit u/s 198		26,73,190

}{1 M}

Maximum Managerial remuneration under Companies Act, 2013 = 11% of Rs. 26,73,190 = Rs. 2,94,051 (rounded off). }{1 M}

Note:

1. Investment Revaluation reserve not to be deducted for calculation of profit under section 198;
2. Profit on sale of forfeited shares not to added for calculation of profit under section 198.

\*Alternative presentation of the above answer also possible by starting from Net profit as per Profit and Loss Account.
