## MOCK TEST PAPER - 2

## INTERMEDIATE: GROUP - I

## PAPER - 3: COST AND MANAGEMENT ACCOUNTING SUGGESTED ANSWERS/HINTS

1. (a) Workings:
(i) Computation of productive hours

| Actual hours worked | $5,34,000$ |
| :--- | ---: |
| Less: Unproductive training hours | $\underline{18,000}$ |
| Actual productive hours | $\underline{5,16,000}$ |

(ii) Productive hours lost:

Loss of potential productive hours + Unproductive training hours
$=1,20,000+18,000=1,38,000$ hours
(iii) Loss of contribution due to unproductive hours:

$$
\begin{aligned}
& =\frac{\text { Sales value }}{\text { Actual productive hours }} \times \text { Total unproductive hours } \\
& =\frac{₹ 99,63,960}{5,16,000 \mathrm{hrs}} \times 1,38,000 \text { hours }=₹ 26,64,780
\end{aligned}
$$

Contribution lost for $1,38,000$ hours $=\frac{₹ 26,64,780}{100} \times 20=₹ 5,32,956$
Computation of profit forgone on account of employee turnover

|  | (₹) |
| :--- | ---: |
| Contribution foregone (as calculated above) | $5,32,956$ |
| Settlement cost due to leaving | 52,584 |
| Recruitment cost | 32,088 |
| Selection cost | $\mathbf{1 5 , 3 0 0}$ |
| Training costs | 36,588 |
| Profit foregone | $\mathbf{6 , 6 9 , 5 1 6}$ |

(b)

Contract Account

|  | Particulars | (₹) |  | Particulars | (₹) |
| :--- | :--- | ---: | :--- | :--- | ---: |
| To | Material issued | $7,53,000$ | By | Machine (Working <br> note 1) | $7,38,000$ |
| ,$"$ | Wages | $16,96,800$ | $"$ | Material (in hand) | $1,06,200$ |
| $"$ | Foreman's salary | $2,43,900$ | $"$ | Works cost <br> (balancing figure) | $31,47,000$ |
| , | Machine | $7,80,000$ |  |  |  |
| , | Supervisor's salary <br> $(₹ 24,000 \times 9) / 2$ | $1,08,000$ |  |  |  |

## Working notes:

1. Written down value of Machine:
$=\frac{₹ 7,80,000-₹ 45,000}{7 \text { years }} \times \frac{146 \text { days }}{365 \text { days }}=₹ 42,000$
Hence, the value of machine after the period of 146 days $=$ ₹ $7,80,000-₹ 42,000$ = ₹ $7,38,000$
2. The cost of $2 / 3^{\text {rd }}$ of the contract is ₹ $31,47,000$
$\therefore$ Cost of $100 \%$ " " " $\frac{\text { ₹ } 31,47,000}{2} \times 3=₹ 47,20,500$
$\therefore$ Cost of $50 \%$ of the contract which has been certified by the architect is ₹ $23,60,250$. Also, the cost of the contract, which has been completed but not certified by the architect is ₹ $7,86,750$.
(c) The marginal cost (variable cost) of ₹ 17,600 is apportioned over the joint products P and Q in the ratio of their physical quantity i.e. $200: 240$

Marginal cost for Product P : ₹ $17,600 \times \frac{200}{440}=$ ₹ 8,000
Marginal cost for Product Q : ₹ $17,600 \times \frac{240}{440}=₹ 9,600$
The fixed cost of ₹ 15,600 is apportioned over the joint products $P$ and $Q$ in the ratio of their contribution margin i.e. 160 : 48 (Refer to working note)
Product P: ₹ $15,600 \times 160 / 208=₹ 12,000$
Product Q: ₹ $15,600 \times 48 / 208=₹ 3,600$

## Working Note:

Computation of contribution margin ratio

| Products | Sales revenue <br> $(₹)$ | Marginal cost <br> $(₹)$ | Contribution <br> $(₹)$ |
| :---: | :---: | :---: | :---: |
| P | 24,000 | 8,000 | 16,000 |
| Q | 14,400 | 9,600 | 4,800 |
| (Refer to above) |  |  |  |

Contribution ratio is $160: 48$

\#Calculation for \% of wastage in process ' $B$ ':
Let's consider number of units lost under process ' $B$ ' = b
Now, $\frac{\text { Total Cost }- \text { Realisable value from normal loss }}{\text { Inputs units }- \text { Normal loss units }}=56$
$\frac{₹ 7,36,540-₹ 28 b}{14,100 \text { units -b }}=₹ 56$
$₹ 7,36,540-₹ 28 b=₹ 7,89,600-₹ 56 b$
$28 b=₹ 53,060=>b=1,895$ units
$\%$ of wastage $=\frac{1,895 \text { units }}{14,100 \text { units }}=13.44 \%$

Less: Unproductive hours Lost while Job Setting $\quad \underline{650}$
Total Operative Hours $\quad \mathbf{1 , 5 0 0}$ per annum

| Advantages |  | Disadvantages |  |
| :--- | :--- | :--- | :---: |
| 1.Time rate is guaranteed while there is <br> opportunity for increasing earnings by <br> increasing production. | 1.Incentive is not so strong as <br> with piece rate system. In fact <br> the harder the worker works, |  |  |
| 2.The system is equitable in as much as the <br> employer gets a direct return for his efforts in he gets per piece. <br> improving production methods and providing <br> better equipment. | 2.The sharing principle may not <br> be liked by employees. |  |  |

(d) Advantages of Integrated Accounts are as follows:
(i) No need for Reconciliation- The question of reconciling costing profit and financial profit does not arise, as there is only one figure of profit.
(ii) Less efforts- Due to use of one set of books, there is a significant saving in efforts made.
(iii) Less time consuming- No delay is caused in obtaining information as it is provided from books of original entry.
(iv) Economical process- It is economical also as it is based on the concept of "Centralisation of Accounting function".
(e)

| S. No. | Fixed Budget | Flexible Budget |
| :--- | :--- | :--- |
| 1. | It does not change with actual volume of <br> activity achieved. Thus it is known as rigid <br> or inflexible budget. | It can be re-casted on the basis of <br> activity level to be achieved. Thus it <br> is not rigid. |
| 2. | It operates on one level of activity and under <br> one set of conditions. It assumes that there <br> will be no change in the prevailing <br> conditions, which is unrealistic. | It consists of various budgets for <br> different levels of activity. |
| 3. | Here as all costs like - fixed, variable and <br> semi-variable are related to only one level <br> of activity so variance analysis does not <br> give useful information. | Here analysis of variance provides <br> useful information as each cost is <br> analysed according to its behaviour. |
| 4. | If the budgeted and actual activity levels <br> differ significantly, then the aspects like <br> cost ascertainment and price fixation do not <br> give a correct picture. | Flexible budgeting at different levels <br> of activity facilitates the <br> ascertainment of cost, fixation of <br> selling price and tendering of <br> quotations. |
| 5. | Comparison of actual performance with <br> budgeted targets will be meaningless <br> specially when there is a difference <br> between the two activity levels. | It provides a meaningful basis of <br> comparison of the actual <br> performance with the budgeted <br> targets. |
