## ACCOUNTS

Q. No. 1 is compulsory.

Candidates are required to answer any four questions from the remaining five questions. Wherever necessary suitable assumptions should be made by the candidates. Working notes should form part of the answer.

## Answer 1:

(a) The decision of making provision for non-moving inventories on the basis of technical evaluation does not amount to change in accounting policy. Accounting policy of a company may require that provision for non-moving inventories should be made. The method of estimating the amount of provision may be changed in case a more prudent estimate can be made.
In the given case, considering the total value of inventory, the change in the amount of required provision of non-moving inventory from Rs. 3.5 lakhs to Rs. 2.5 lakhs is also not material. The disclosure can be made for such change in the following lines by way of notes to the accounts in the annual accounts of ABC Ltd. for the year 2016-17:
"The company has provided for non-moving inventories on the basis of technical evaluation unlike preceding years. Had the same method been followed as in the previous year, the profit for the year and the corresponding effect on the year end net assets would have been lower by Rs. 1 lakh."

## Answer:

(b) Statement showing amount of depreciation as per Componentization Method-

| Component | Depreciation (Per annum) |
| :--- | ---: |
|  | (Rs.) |
| Land | $\mathbf{N i I}\{1 / 2 \mathrm{M}\}$ |
| Roof | $\mathbf{4 0 , 0 0 0}\{1 \mathrm{M}\}$ |
| Lifts | $\mathbf{2 5 , 0 0 0}\{1 \mathrm{M}\}$ |
| Fixtures | $\mathbf{5 0 , 0 0 0}\{1 \mathrm{M}\}$ |
| Remainder of Building | $\mathbf{1 , 0 0 , 0 0 0}\{1 \mathrm{M}\}$ |
|  | $2,15,000$ |

Note: When the roof requires replacement at the end of its useful life the carrying amount will be nil. The cost of replacing the roof should be recognized as a new component.

## Answer:

(c) As per AS 13 (Revised) 'Accounting for Investments, for investment in shares - if the investment is purchased with an intention to hold for short-term period (less than one year), then it will be classified as current investment and to be carried at lower of cost and fair value.
In the given case Rs. 25,000 shares held as current investment will be carried in the books at Rs. 23,750 (Rs. 47,500/2).
If equity shares are acquired with an intention to hold for long term period (more than one year), then should be considered as long-term investment to be shown at cost in the Balance Sheet of the company. However, provision for diminution should be made to recognize a decline, if other than temporary, in the value of the investments. Hence, Rs. 25,000 shares held as long-term investment will be carried in the books at Rs. 25,000.

Gold and silver are generally purchased with an intention to hold them for long term period (more than one year) until and unless given otherwise.
Hence, the investment in Gold and Silver (purchased on 1st March, 2019) should continue to be shown at cost (since there is no 'other than temporary' diminution) as on 31st March, 2020. Thus Gold at Rs. 1,00,000 and Silver at Rs. 30,00,000 respectively will be shown in the books.

## Answer:

(d) (a) Interest for the period 2014-15
$=$ US \$ 10 lakhs $\times 4 \% \times$ Rs. 62 per US $\$=$ Rs. 24.80 lakhs $\}\{3 / 4 \mathbf{~ M \}}$
$\left.\begin{array}{l}\text { (b) Increase in the liability towards the principal amount } \\ =\text { US } \$ 10 \text { lakhs } \times \text { Rs. }(62-56)=\text { Rs. } 60 \text { lakhs }\end{array}\right\} \mathbf{3 / 4} \mathbf{~ M \}}$
(c) Interest that would have resulted if the loan was taken in Indian currency $\}\{3 / 4 \mathrm{M}\}$
$=$ US $\$ 10$ lakhs $\times$ Rs. $56 \times 10.5 \%=$ Rs. 58.80 lakhs
(d) Difference between interest on local currency borrowing and foreign currency $\}\{3 / 4 \mathrm{M}\}$
borrowing = Rs. 58.80 lakhs - Rs. 24.80 lakhs = Rs. 34 lakhs.

Therefore, out of Rs. 60 lakhs increase in the liability towards principal amount, only Rs. 34 lakhs will be considered as the borrowing cost. Thus, total borrowing cost would be Rs. 58.80 lakhs being the aggregate of interest of Rs. 24.80 lakhs on foreign currency borrowings plus the exchange difference to the extent of difference between interest on local currency borrowing and interest on foreign currency borrowing of Rs. 34 lakhs.
Hence, Rs. 58.80 lakhs would be considered as the borrowing cost to be accounted for as per AS 16 and the remaining Rs. 26 lakhs ( $60-34$ ) would be considered as the exchange difference to be accounted for as per AS 11.

Answer 2:
(a) (a) Number of Bonus shares to be issued:

Existing paid up Capital $=60,000$ Shares
Number of Bonus Shares $=(60,000 \times 1) \div 5=12,000$ Shares (i.e. for Rs. 1,20,000)
(b) Bonus out of General Reserve:

It is a usual practice to utilize specific reserve (available for specific purpose). Therefore, if CRR and Securities Premium are available, then company should utilize these reserves in priority over other free reserves. It is clear that company should not use General Reserve, in the given example, as Capital Redemption Reserve and Securities Premium are sufficiently available.

## Working Notes:

1. Calculation of Sales Ratio

Let the average sales per month be $x$
Total sales from 01.04.20X2 to 30.06.20X2 will be $3 x$
Average sales per month from 01.07.20X2 to 31.03.20X3 will be $2 x$ Total sales from 01.07.20X2 to $31.03 .20 \times 3$ will be $2 x \times 9=18 x$ Ratio of Sales will be $3 x$ : $18 x$ i.e. $3: 18$ or 1:6 \}\{3/4 M\}
2. Calculation of time Ratio

3 Months: 9 Months i.e. 1:3 \}\{1/2 M\}
3. Apportionment of Salary

## Answer:

(b) (a) (i) Ex-right value of the shares = (Cum-right value of the existing shares + Rights shares $X$ Issue Price) / (Existing Number of shares + No. of right shares)

$$
\begin{aligned}
& =(\text { Rs. } 140 \times 4 \text { Shares }+ \text { Rs. } 120 \times 1 \text { Share }) /(1+4) \text { Shares }\}\left\{\mathbf{1}^{1 / 2} \mathbf{~ M}\right\} \\
