## Answer 1:

(a) Following will be the treatment in the given cases:
(a) When sales price of Rs. 50 lakhs is equal to fair value, Reliance Ltd. should immediately recognise the profit of Rs. 10 lakhs (i.e. $50-40$ ) in its books. $\}$
(b) When fair value is Rs. 60 lakhs then also profit of Rs. 10 lakhs should be immediately recognised by Reliance Ltd.
(c) When fair value of leased machinery is Rs. 45 lakhs \& sales price is Rs. 38 lakhs, then loss of Rs. 2 lakhs ( $40-38$ ) to be immediately recognised by Reliance Ltd. in its books provided loss is not compensated by future lease payment.
(d) When fair value is Rs. 40 lakhs \& sales price is Rs. 50 lakhs then, profit of
(e) When fair value is Rs. 46 lakhs \& sales price is Rs. 50 lakhs, profit of Rs. 6 lakhs $(46-40)$ to be immediately recognised in its books and balance profit of Rs. 4 lakhs (50-46) is to be amortised/deferred over lease period.
(f) When fair value is Rs. 35 lakhs \& sales price is Rs. 39 lakhs, then the loss of Rs. 5 lakhs (40-35) to be immediately recognised by Reliance Ltd. in its books and profit of Rs. 4 lakhs (39-35) should be amortised/deferred over lease period.

## Answer:

(b) As per AS 26, costs incurred in creating a computer software product should be charged to research and development expense when incurred until technological feasibility/asset recognition criteria has been established for the product. Technological feasibility/asset recognition criteria have been established upon completion of detailed program design, coding and testing. In this case, Rs. 90,000 would be recorded as an expense (Rs. 50,000 for completion of detailed program design and Rs. 40,000 for coding and testing to establish technological feasibility/asset recognition criteria). Cost incurred from the point of technological feasibility/asset recognition criteria until the time when products costs are incurred are capitalized as software cost ( $63,000+18,000+19,500$ ) = Rs. 1,00,500. Packing cost Rs. 16,500 should be recognized as expenses and charged to P \& LA/c.

Answer:
(c) Computation of Basic Earnings per share-

## Working Notes:

1. Computation of theoretical ex-rights fair value per share $=$

## Answer:

(d) As per AS 9 "Revenue Recognition", in a transaction involving the sale of goods, performance should be regarded as being achieved when the following conditions are fulfilled:
(i) the seller of goods has transferred to the buyer the property in the goods for a price or all significant risks and rewards of ownership have been transferred to the buyer and the seller retains no effective control of the goods transferred to a degree usually associated with ownership; and
(ii) no significant uncertainty exists regarding the amount of the consideration that will be derived from the sale of the goods.
Case (i): 25\% goods lying unsold with consignee should be treated as closing inventory and sales should be recognized for Rs. 3,00,000 (75\% of Rs. 4,00,000) for the year ended on 31.3.17. In case of consignment sale revenue should not be recognized until the goods are sold to a third party.
Case (ii): The sale is complete but delivery has been postponed at buyer's request. Fashion Ltd. should recognize the entire sale of Rs. 1,95,000 for the year ended $31^{\text {st }}$ March, 2017.
Case (iii): In case of goods sold on approval basis, revenue should not be recognized until the goods have been formally accepted by the buyer or the buyer has done an act adopting the transaction or the time period for rejection has elapsed or where no time has been fixed, a reasonable time has elapsed. Therefore, revenue should be recognized for the total sales amounting Rs. 2,50,000 as the time period for rejecting the goods had expired.
Thus total revenue amounting Rs. $7,45,000(3,00,000+1,95,000+2,50,000)$ will be recognized for the year ended $31^{\text {st }}$ March, 2017 in the books of Fashion Ltd.

## Answer 6:

(a) In the given case, Milk Ltd. concurrently agreed to repurchase the same goods from Curd Ltd. on $1^{\text {st }}$ Feb., 2017. Also the re-selling price is pre-determined and covers purchasing and holding costs of Curd Ltd. Hence, the transaction between Milk Ltd. and Curd Ltd. on $1^{\text {st }}$ Feb., 2017 should be accounted for as financing rather than sale. The resulting cash flow of Rs. 9.60 lakhs received by Milk Ltd., cannot be considered as revenue as per AS 9 "Revenue Recognition".

## Answer:

According to AS 18 on 'Related Party Disclosures', parties are considered to be related if at any time during the reporting period one party has the ability to control the other party or exercise significant influence over the other party in making financial and/or operating decisions. Hence, Mr. Raj, a relative of key management personnel should be identified as related party for disclosure in the financial statements for the year ended 31.3.2021.
(ii) As per AS 18, transactions of $X$ Ltd. with its associate company for the first quarter ending 30.06 .2020 only are required to be disclosed as related party transactions. The transactions for the period in which related party relationship did not exist need not be reported.

## Answer:

(c) Garner vs. Murray rule: When a partner is unable to pay his debt due to the firm, he is said to be insolvent and the share of loss is to be borne by other solvent partners in accordance with the decision held in the English case of Garner vs. Murray. According to this decision, normal loss on realisation of assets is to be brought in cash by all partners (including insolvent partner) in the profit sharing ratio but a loss due to insolvency of a partner has to be borne by the solvent partners in their capital ratio. In order to calculate the capital ratio, no adjustment will be made in case of fixed capitals. However, in case of fluctuating capitals, ratio should be calculated on the basis of adjusted capital before considering profit or loss on realization at the time of dissolution.
Non-Applicability of Garner vs Murray rule:

1. When the solvent partner has a debit balance in the capital account.

Only solvent partners will bear the loss of capital deficiency of insolvent partner in their capital ratio. If incidentally a solvent partner has a debit balance in his capital account, he will escape the liability to bear the loss due to insolvency of another partner.
2. When the firm has only two partners. $\}\{1 \mathrm{M}\}$
3. When there is an agreement between the partners to share the deficiency in capital account of insolvent partner.
4. When all the partners of the firm are insolvent. $\}\{\mathbf{1} \mathbf{M}\}$
