## COST AND MANAGEMENT ACCOUNTING

Answer to questions are to be given only in English except in the case of candidates who have opted for Hindi Medium. If a candidate who has not opted for Hindi Medium. His/her answer in Hindi will not be valued.

Question No. 1 is compulsory.
Candidates are also required to answer any Four questions from the remaining Five Questions.
In case, any candidate answers extra question(s)/sub-question(s) over and above the required number, then only the requisite number of questions first answered in the answer book shall be valued and subsequent extra question(s) answered shall be ignored.
Wherever necessary, suitable assumptions may be made and disclosed by way of note.

Answer 1:
(a) (i) Fixed cost for the year

Total Sales (43,200 units $\times$ Rs. 150 per unit) $=$ Rs. 64,80,000
Break Even Sales
$=$ Rs. $64,80,000 \times 25 \%=$ Rs. 16,20,000
Fixed cost = Break Even Sales x P/V ratio
$=$ Rs. $16,20,000 \times 20 \%=$ Rs. $\mathbf{3 , 2 4 , 0 0 0}$
(ii) Profit earned for the year

Profit
(iii) Margin of Safety in units

Margin of safety (units)

$$
\begin{aligned}
& =\frac{\text { Profit }}{\text { Cont. per unit }} \\
& =\frac{\text { Rs. } 9,72,000}{R s .30}=32,400 \text { units }
\end{aligned}
$$

(iv) No of units to be sold to earn a profit of Rs. $12,00,000$

Desired Sales

$$
\begin{aligned}
& =\frac{\text { Fixed Cost }+ \text { Desired Profit }}{\text { Cont. per unit }} \\
& =\frac{\text { Rs. } 3,24,000+\text { Rs. } 12,00,000}{R s . ~} 30 \\
& =50,800 \text { units }
\end{aligned}
$$

(Each point 1.25 M)
Answer:
(b) (a) Variable Cost per Unit = Change in Semi - variable cost under two production level Change in production quantity in two levels

$$
\begin{aligned}
& =\frac{\text { Rs. } 3,10,000-\text { Rs. } 2,80,000}{42,000 \text { units }-36,000 \text { units }} \\
& =\text { Rs. } 5 \text { per units } \quad\}(2.5 \mathbf{~ M})
\end{aligned}
$$

(b) Total Fixed Cost $=$ Semi Variable Cost for 36,000 units - Variable cost for 36,000 units

$$
\begin{aligned}
& =\text { Rs. } 2,80,000-(36,000 \text { units } \times \text { Rs. } 5) \\
& =\text { Rs. } 1,00,000 \quad \text { \}(2.5 M) }
\end{aligned}
$$

## Answer:

(c) (a)
(a) Rated capacity
36.5 tonnes
(Refers to the capacity of a machine or a plant as indicated by its manufacturer)
(b) Practical capacity
30.0 tonnes
[Defined as actually utilised capacity of a plant i.e. $\frac{36.5 \text { tonnes }}{365 \text { days }} \times(365-65)$ days
(c) Normal capacity
25.0 tonnes
(It is the capacity of a plant utilized based on sales expectancy)
(d) Actual capacity 25.2 tonnes
(Refers to the capacity actually achieved)
(Each point 1.25 M)

It is also noted that average hourly rates for the three Departments $\mathrm{X}, \mathrm{Y}$ and Z are similar.
You are required to :
(i) Draw up a job cost sheet.
(ii) Calculate the entire revised cost using 20X2 actual figures as basis.
(iii) Add $20 \%$ to total cost to determine selling price.

## Answer:

(c) Zero-based Budgeting: (ZBB) is an emergent form of budgeting which arises to overcome the limitations of incremental (traditional) budgeting system. Zero- based Budgeting (ZBB) is defined as 'a method of budgeting which requires each cost element to be specifically justified, although the activities to which the budget relates are being undertaken for the first time, without approval, the budget allowance is zero'.

ZBB is an activity based budgeting system where budgets are prepared for each activities rather than functional department. Justification in the form of cost benefits for the activity is required to be given. The activities are then evaluated and prioritized by the management on the basis of factors like synchronisation with organisational objectives, availability of funds, regulatory requirement etc.
ZBB is suitable for both corporate and non-corporate entities. In case of non-corporate entities like Government department, local bodies, not for profit organisations, where these entities need to justify the benefits of expenditures on social programmes like mid-day meal, installation of street lights, provision of drinking water etc.

## ZBB involves the following stages:

(i) Identification and description of Decision packages
(ii) Evaluation of Decision packages
(iii) Ranking (Prioritisation) of the Decision packages
(iv) Allocation of resources
